Direct Print Solution

DIRECT PRINT
PictBridge
Easy-PhotoPrint EX

Print/Share Button
Simply connect your camera to a PictBridge-compatible printer or a PC*, and press the Print/Share Button. With one button, professional photo prints are yours in moments or images easily transfer to your PC*.

Direct Print
The direct connection of your camera to a printer eliminates the need for a computer – print direct with a Canon Compact Photo Printer, Direct Photo Printer or a PictBridge-compatible printer.

ID Photo/Movie Print
Make handy ID photo size prints and much more. And make more of your movies, with the clever Movie Print feature that prints a whole series of movie stills on a single page.

* Windows only.

An Elegant Evolution.

High-Quality Lens
Precision optics are the heart and soul of the PowerShot Digital ELPH series. The development of advanced UA Lens Technology* allows for even greater miniaturization, resulting in camera bodies that are slimmer and smaller, with an elegance that is the spirit of Digital ELPH.

DIGIC & DIGIC II Image Processors
Canon's revolutionary DIGIC Image Processors mastermind picture quality and camera performance. Quick start-up, faster processing, autofocus speed, and rapid continuous shooting are now revved up even further with the introduction of DIGIC II*.

Autofocus
Advanced highly sensitive focusing sensors positioned across the entire picture plane ensure razor sharp images every time you press the shutter. All you have to do is focus on the perfect composition. When subjects are far off-center, count on single-point AF.

Shooting Modes
Depend on the Digital ELPH to instantly handle every photo situation. Select from up to ten pre-programmed shooting modes including Scene Modes*: Portrait, Landscape, Night Snapshot, Indoor, Underwater, Kids & Pets, Digital Macro, Stitch Assist, Auto and Manual. With the new Digital Macro* setting, the wonders of nature come closer than ever.

Movie Modes
The Digital ELPH is a moving experience. Enhanced Movie Mode lets you record movies with sound up to the capacity of the memory card* and play them back on the camera's LCD screen, your computer or TV. An enhanced movie feature on some models records 60 frames-per-second full motion, great for sports scenes.

* available with SD300 & SD200

UA Lens

DIGIC

DIGIC II

SD300 | The signature attitude
